Change setup of all computers
Your users' computers might not see the Windows for Express Networks setup changes you made (such as Internet connection, printers added, etc.) until you make corresponding setup changes on each user's computer.
To set up each user's computer:
1. On the Start menu, point to Programs, Windows for Express Networks, and then click Computer Setup Wizard.
2. Follow the instructions in the wizard.
To set up your computer now, click the following hyperlink.
